Comments for the MGRA:

-Against the use of boats on the lake to access the glacier, I think movement across the lake isn't a bad idea, but offloading visitors unsupervised would not only cause safety concerns, but also would take the need for guides away maybe hurting tourism elsewhere

-Against the welcome center and parking lot needing to have kettle ponds filled in

-Think the parking lot might need to be rethought, visitors complain about walking from the teardrop now, a further walk might require wheelchair access

-Concerned about the implementation of a fish viewing causing problems with the salmon run
