Comments:

I adamantly oppose the "revision of the locatable mineral regulations." Noted as: "Federal Register notices: 36 CFR part 228 subpart A and CFR part 228, subpart E. I see this as one BRAZEN and HASTY effort that the agency has undertaken to make a priority (regulation reform) without fair announcement, and adequate time for public awareness and public input. Our Natural Resources is our most precious life source. If we continue to take natural resources from the people, (constituents) the ability and opportunity to receive knowledge of such taking, our Departments will see the day when The Constitution will be made clear in its effort to protect the "welfare" of the citizens of this country. It is in place for precisely these times. Shame on the Agencies who attempt to pose Jobs vs natural habitat preservation. Economic equality should never confuse itself with the higher standards of balance and well being. We need nature. Thank you for your time and consideration of this grievance. Respectfully, Angie Arden
