- ☒ Land Management Plan
- ☐ Regional Forester's List of SCC

**Statement of issues and/or parts of the plan revision to which the objection applies:**  
Recreation Opportunity Spectrum (ROS)

**Concise statement explaining the objection and suggesting how the proposed plan should be improved:**

- The reasons for this objection are: GFTBRA objects to the addition of 98,208 of primitive ROS in the Little Belt Mountains. We believe this designation predetermines the outcome of future travel planning efforts and will eliminate the possibility of additional loops for motorized and mechanized recreation without either forest plan revision or congressional action. We believe the designation should be semi-primitive motorized, which would allow for flexibility without plan revisions.
- **Proposed Solution:**
- Change ROS for 98,208 acres designated as primitive to semi-primitive motorized.
