

Comments posted to our website and social media in regards to **Steamboat Resort Improvements Project #58336**

“Terrain should be traversed how it is naturally”

“The areas hidden behind the front hills are an environmental disaster. No effort has been made to replant areas effected by trails and lifts. Mountain creeks have been turned into muddy ditches. Stop any expansion until we take care of the areas that currently exist.”

“I am very interested in supporting this for numerous reasons. Foremost, I believe we should be stewards of the land in protecting as much as possible.”

“There is no need to be tearing up and through natural habitats. Steamboat is beautiful and fine the way it is. If people wanna go to a big developed resort with construction everywhere they can just go to copper mountain. Please save the natural habitats and don’t be a Donald trump”

“Stop destroying our wilderness areas. The pine Grove debacle was bad enough. We are tired of the greed and disrespect to our community.”

“I will be in touch with the forest service to state my opposition to the proposed expansion and the reasons why.”

“This is the absolute worst idea in Steamboat history and should be removed from the greedy agenda that is now plaguing this once beautiful and natural terrain!!”

“There will be opposition to this and should be. It’s a terrain grab to boat numbers in advertising, and this mountain has a lot to do to catch up to the crowds it’s enticing out here. Many weeks of capacity crowds already a year, and the pass isn’t worth it at that rate. Terrain is untamable over there, what are you going to do, rope off everything? Routes will also become dangerous from over use. Lots to not like.”
