

Ms. Jackson,

Thank you for the opportunity to provide feedback on the Stibnite Gold Project as part of the public permitting process. I know this project will have a positive impact on the environment, communities surrounding the site and Idahoans.

I believe the project presents a plan to repair the environment and boost Idaho's economy - particularly under Alternative 2. The idea that you would even recommend putting the tailings storage facility in a pristine drainage that has no existing impacts is crazy, what were you thinking.

Historic mining operations, development of former town site and natural processes have resulted in significant degradation of many elements of the environment. Loss of fish passage, water degradation from previous mining activity and excessive erosion are all of great concern to our community. The Stibnite Gold Project would finance reclamation efforts to address these problems and in turn boost Idaho's economy. It is a win-win for our community.

It is with this knowledge that I encourage the U.S. Forest Service to select the modified plan of restoration and operations Midas Gold Idaho presented and permit the project.

Thanks for your Consideration,

Name: Tim Provancher
