

Hello,

Thank you for the opportunity to provide feedback on the Stibnite Gold Project as part of the public permitting process. I know this project will have a positive impact on the environment and the communities surrounding the site and Idahoans.

Midas Gold Idaho is not your typical mining company. The company realizes the Stibnite Gold Project site has been damaged after nearly a century of mining and that something must be done if we ever want to reclaim this brownfield site. Midas Gold Idaho wants to restore the site and take care of the environment through mining. This endeavor will create many high paying jobs and have an added bonus of producing antimony of which our nation desperately needs a secure and reliable source .

This is an excellent opportunity for an American corporate entity to demonstrate to the people how a site like this can be restored without the government reaching into their pockets to get it done. Therefore I encourage the U.S. Forest Service to move the Stibnite Gold Project forward and adopt Alternative two as the preferred alternative.

Regards, William M. Everly
