

Attention payette national forest supervisor,

I appreciate the opportunity to comment on the Stibnite Gold Project as it will directly impact me and my access to the backcountry.

Midas Gold Idaho is not your typical mining company. The company realizes the Stibnite Gold Project site has been damaged after nearly a century of mining and that something must be done if we ever want to reclaim this brownfield site. Midas Gold Idaho wants to restore the site and take care of the environment through mining. I believe alternative 2 as outlined by the U.S. Forest Service is the best chance to help the repair the historic Stibnite Mining District.

It is with this knowledge that I encourage the U.S. Forest Service to select the modified plan of restoration and operations Midas Gold Idaho presented and permit the project.

Most Respectfully,

Name: Dennis and Christine Morris
