

Attention Linda Jackson,

Thank you for the opportunity to provide feedback on the Stibnite Gold Project as part of Midas Gold Idaho's Draft Environmental Impact Statement. Public participation is a huge part of the permitting process and I appreciate the opportunity to share my thoughts.

As it stands today, the Stibnite Gold Project site is a brownfield site. The U.S. government tried to restore the area years ago but the work that was done didn't go far enough. The old tailings piles left by previous mining companies are still unconstrained and therefor present a risk of leaching minerals into nearby streams and the groundwater. Each year, hundreds of tons of sediment continue to be dumped into the East Fork of the South Fork of the Salmon River and other waterways from Blowout Creek, impacting water quality and aquatic habitat. And fish still are not able to swim past the Yellow Pine pit to their natural spawning grounds. This area needs to be remediated and Midas Gold has a plan to do it the right way. It is outlined as alternative 2 in the dEIS.

Reviewing Midas Gold's plans it is clear to me the company really believes in taking care of the environment and keeping the community safe. I urge you to permit the Stibnite Gold Project as outlined under Alternative 2 and keep this project moving forward.

Best Wishes,

Name: Riley J Law
