

Ms. Jackson,

I believe the Midas Gold Project offers a valuable opportunity to see the river properly restored, an undertaking that government agencies would not have funding for and otherwise may never be done. I think it's also important for the US to become more independent in terms of mineral resources and antimony production is an important part of that. I love Idaho and I trust Midas Gold to responsibly carry out this project that will benefit everyone.

Thank You,

Name: Owen Tolley
