

U.S.F.S.,

If Midas Gold Idaho is allowed to move forward with the Stibnite Gold Project, they will reclaim an area impacted by historical mining, create hundreds of well-paying jobs and provide a huge boost to our economy in the process. It is a win-win for Valley County. We need to permit the project.

Midas Gold Idaho is proposing a great project for Idaho's economy, citizens and environment. When the project goes into production, the company plans to invest \$1 billion in Idaho and provide approximately 1,000 jobs over the course of the mine's life. During construction, the annual payroll is estimated to range from \$42 million to \$49 million. Midas Gold has made a commitment to look to Idaho first for talent and supplies which will have a major trickledown effect and positively impact many facets of the state's economy. Alternative 2 presents the best option to protect Idaho's environment. It eliminates the West End development rock storage facility, limits the footprint of the project and extends the lining in Meadow Creek to protect against streamflow reductions. Alternative 3 would cause us to miss out on water quality benefits because under this proposal the tailings storage facility would be moved to more pristine habitat and leave the existing tailings unprocessed. According to DEIS chapter 4, section 4.9, removing legacy tailings and managing water quality provides long-term reduction in metal loading in ground and surface water. It is for these reasons, I hope the Forest Service moves forward with Alternative 2.

For the above reasons and many more, please move forward with alternative 2 of the Stibnite Gold Project as it is important to all Idahoans.

Have a good day,

Name: Charles Sands
