

Dear US National Forest Service Staff,

I am writing to express my full support of Midas Gold Idaho and the Stibnite Gold Project. Midas Gold has shown they are committed to Idaho and want to take care of the environment. I hope you move forward and permit this project as quickly as possible.

One of the biggest challenges facing Idaho is having a trained workforce. Midas Gold not only plans to hire hundreds of Idahoans but the company will provide employees with training to build a more skilled workforce in Idaho. We applaud Midas Gold's commitment to helping Idahoans get valuable training that may not otherwise be available. This commitment by the company will help benefit Idaho families and allow Idaho to attract new businesses in the future. To date, Midas Gold has spent over \$89 million in Idaho by prioritizing local vendors and contractors. If the project moves forward, the company will also invest heavily in environmental restoration, especially under alternative 2. During operations, Midas Gold will treat water to lower levels of arsenic, antimony and mercury in the river. This investment will cause concentrations to be below the current baseline conditions (DEIS 4.9-70). The company will also be able to increase productivity and genetic diversity of isolated populations of chinook, bull trout and steelhead by opening up long-term access to blocked habitat (DEIS 4.2-39).

Reviewing Midas Gold's plans it is clear to me the company really believes in taking care of the environment and keeping the community safe. I urge you to permit the Stibnite Gold Project as outlined under Alternative 2 and keep this project moving forward.

Most Respectfully,

Name: David C Seyer
