

Ms. Jackson,

Thank you for the opportunity to provide feedback on the Stibnite Gold Project as part of the public permitting process. I know this project will have a positive impact on the environment, communities surrounding the site and Idahoans.

The Stibnite Gold Project will help to restore the environment in our region. Under alternative two, Midas Gold has prioritized restoration work so many of the efforts occur early in the project. For example, Midas Gold will build a fish passageway around the Yellow Pine pit to provide access to native upstream habitat. The U.S. Forest Service's analysis in the DEIS (4.2-39) shows this could increase and improve overall productivity and even diversity among chinook salmon, bull trout and steelhead. The company is also required to set aside all of the funds needed to properly restore the site in a special trust so the land will be restored no matter what happens to the company. Reclamation efforts have already started at the site. Midas Gold has planted thousands of trees and worked to reduce sediment entering waterways near the site. To me, these actions prove the company is truly committed to restoring the site.

After reading my letter, I hope you can see why you should permit the Stibnite Gold Project. This project is a good thing for Idaho, helps decrease America's dependence on foreign countries for critical minerals and cleans up the environment.

Warm regards,

Name: Jaimie Donovan
