

Greetings,

Thank you for the opportunity to provide feedback on the Stibnite Gold Project as part of Midas Gold Idaho's Draft Environmental Impact Statement. Public participation is a huge part of the permitting process and I appreciate the opportunity to share my thoughts.

If you examine Midas Gold Idaho's Plan of Restoration and Operations, it is evident the company identified the best possible plan to restore the site under Alternative Two. The company is limiting its footprint to existing disturbance as much as possible to minimize new disturbance, natural fish spawning routes will be restored after being blocked for decades and the company has plans to make improvements that will keep thousands of pounds of sediment out of the river each year. According to 4.12-22 of the draft Environmental Impact Statement, Alternative two would provide an additional 26.5 km of habitat for anadromous salmonoids becomes available before mining begins, a net gain of 11.1 km of intrinsic potential habitat for steelhead trout and 12.4 km for bull trout. The document also indicates this alternative could help to increase productivity and diversity of these fish by opening up access to historically blocked habitat (DEIS 4.12-39). Unfortunately, if Midas Gold Idaho is not allowed to move forward with its plan, it is highly unlikely that these critical improvements will ever happen.

I urge you to accept Midas Gold's plan as outlined under alternative 2 and continue moving this project forward.

Most Respectfully,

Name: Jason humphrey
