

As an Idaho Native and a graduate of the University of Idaho, I would like to add my support gold mine that Midas Gold is proposing to build at Stibnite. In addition to the well-paying jobs and the positive community impact this is a way to get correct an environmental problem at no cost to the tax payer.

When this area was mined many years ago the standards, as well as knowledge, was much different. Responsible mining and related financial guarantees, such as are proposed for Stibnite are a win for everyone.

I highly recommend the approval of this application.
