

Attention payette national forest supervisor,

Midas Gold Idaho has been a member of our community for the past decade. During this time, the company and its employees have become wonderful champions and supporters of our community. They've volunteered their time in our schools and given generously to community causes. The company's track record of following through on its promises and doing the right thing gives us the confidence to write in support of permitting the Stibnite Gold Project.

The Stibnite Gold Project, as presented in Alternative 2, could leave the historical Stibnite Mining District in better condition than it is today. It would result in better water quality in the East Fork of the South Fork of the Salmon River due to lower concentrations of antimony, mercury and arsenic (DEIS 4.9-70) and open an additional 26.5 km of habitat for anadromous salmonoids before mining begins (DEIS 4.12-13). When you compare Alternative 2 with the other options, the choice of how to proceed is obvious. Alternative 3 and 4 would delay the start of the project by two years. Alternative 3 has a larger project footprint size and Alternative 4 would put traffic to the site directly next to the East Fork of the South Fork of the Salmon River. Alternative 5 would leave the site exactly as it is today " in desperate need of repair. The site needs attention and Alternative 2 would make sure it finally gets it.

Thank you for reviewing my comments. Again, I urge you to permit Midas Gold's carefully thought out plan as outlined under alternative 2.

Best Wishes,

Name: Stacy Callen
