

Attention Keith Lannom,

I am writing in support of Alternative 2 of the DEIS for the Stibnite Midas Gold project.

I believe that the company has put forward a balanced proposal that incorporates good mining practices to access critical minerals for the U. S. economy, done in a responsible manner with the added benefit of cleaning up past problems.

It is obvious that the proposals have faced significant environmental study and review. I support moving forward with the project in a timely manner.

Respectfully,

Doug Tims
