USFS,

Thank you for the opportunity to provide feedback on the Stibnite Gold Project as part of Midas Gold Idaho's Comment Period. I have been closely following Midas Gold Idaho's plans since they first came into our state, in large part because much of the proposed project will take place on public land. The more I have learned about the project, the more excited I am about the possibilities it will bring into our state.

Having compared Alternative 2 with Alternative 3, I believe that Alternative 2 is better from an environmental perspective, having less area, less impact on wetlands based on functional units, less impact on stream reach and avoiding a costly two-year delay to the project. Further, I also believe that Alternative 2 is lower risk and environmentally less impactful and risky than Alternative 4 given the proximity of the Alternative 4 transportation route to major fish-bearing waterways where construction would pose a significant risk, and the delay the project unnecessarily for two additional years at considerable cost. Finally, Alternative 5 is the worst of all alternatives as it means no environmental restoration, no jobs, no capital investment and leaves environmental issues at site unresolved.

For the above reasons and many more, please move forward with alternative 2 of the Stibnite Gold Project as it is important to all Idahoans.

Regards,

Name: Donna Seyer
