

USFS,

I am writing to express my full support of Midas Gold Idaho and the Stibnite Gold Project. Midas Gold has shown its commitment to Valley County and the state of Idaho and I encourage you to adopt the proposed activities outlined in Alternative 2 during the permitting process.

The study of the Stibnite Gold Project brought to light the environmental conditions existing at Stibnite because of past operators. Arsenic levels in the East Fork of the South Fork of the Salmon River are far beyond safe standards. If Alternative 5 is selected, how will USFS address these legacies impacting the waters of Idaho? Who will pay to provide permanent and volitional fish passage? No one has stepped up to clean the site yet and I find it highly unlikely another opportunity like the Stibnite Gold Project will come around. Midas Gold has presented plans to improve water quality and fish habitat under Alternative 2. Section 4.12-39 of the DEIS shows reconnecting fish to more habitat upstream will increase productivity and diversity of these isolated populations. We cannot let the site continue to suffer.

I live on the other side of the state in Salmon - a small town that has also long been dependent on logging and mining to keep its economy strong. Since those job opportunities were phased out, the town has continued to decline economically. Idaho needs these jobs.

While the economic benefits of this project cannot be ignored, it also will transform an area in need for environmental repair. It is for all of these reasons that I encourage you to move the Stibnite Gold Project forward as outlined in alternative 2 within this 60-day comment period. .

Best Wishes,

Lexton Adams-Lett
