

USFS,

This letter is to express my support of Midas Gold's Stibnite Gold Project. America needs this project to be permitted. I hope after reading my thoughts you will understand why my support for Midas Gold Idaho is so strong.

Midas Gold has made it clear reclamation efforts will start alongside operations. For example, before mining ever begins, fish will be reconnected to their native spawning groups upstream through a fish passageway. Eventually, the Yellow Pine Pit will be backfilled and the river can be permanently reconnected. Analysis in the draft Environmental Impact Statement showed removing existing barriers to fish migration will help Chinook salmon, bull trout and Steelhead. In fact, DEIS 4.12-39 says long-term access to blocked habitat would result in increased genetic diversity of isolated populations and productivity. They have worked to find safe access routes to the site that keeps vehicles away from our precious waterways. Additionally, under alternative 2, the company decreased traffic during operations by 26 percent by generating lime on site (table 2.3-2, 2.4-3, 2.3-8). Plus, the company is trying to minimize their impact on the environment by keeping facilities within the existing footprint of historic mining operations.

This project is a huge opportunity for Idaho. I encourage the U.S. Forest Service to permit alternative 2 so this brownfield site can finally be restored.

Respectfully,

Name: Greg Pomeroy
