

Ms. Jackson,

Midas Gold Idaho has been a member of our community for the past decade. During this time, the company and its employees have become wonderful champions and supporters of our community. They've volunteered their time in our schools and given generously to community causes. The company's track record of following through on its promises and doing the right thing gives us the confidence to write in support of permitting the Stibnite Gold Project.

One of the biggest challenges facing Idaho is having a trained workforce. Midas Gold not only plans to hire hundreds of Idahoans but the company will provide employees with training to build a more skilled workforce in Idaho. We applaud Midas Gold's commitment to helping Idahoans get valuable training that may not otherwise be available. This commitment by the company will help benefit Idaho families and allow Idaho to attract new businesses in the future. To date, Midas Gold has spent over \$89 million in Idaho by prioritizing local vendors and contractors. If the project moves forward, the company will also invest heavily in environmental restoration, especially under alternative 2. During operations, Midas Gold will treat water to lower levels of arsenic, antimony and mercury in the river. This investment will cause concentrations to be below the current baseline conditions (DEIS 4.9-70). The company will also be able to increase productivity and genetic diversity of isolated populations of chinook, bull trout and steelhead by opening up long-term access to blocked habitat (DEIS 4.12-39).

Midas Gold wants to restore the rivers, wildlife and habitat near the Stibnite Gold Project site. We should let them. Please permit the Stibnite Gold Project.

Cheers!

Leah Henry
