

Dear Ms. Linda Jackson,

I have reviewed the Plan of Restoration and Operations and met with members of Midas Gold Idaho to better understand the company's plans for the Stibnite Gold Project. Below are my comments on the plan to be included in the comment period.

Restoring the Stibnite Gold Project site will be an incredible investment. Work clearly needs to be done in the area but it should not be funded through taxpayer dollars. Fortunately, Midas Gold Idaho wants to make the investment. The company is proposing a mining project and full-scale restoration project. They have plans to reconnect fish with their natural spawning grounds. According to analysis by the U.S. Forest Service in section 4.2 of the DEIS, establishing long-term access to historically blocked critical habitat would result in increased productivity for Idaho's bull trout, chinook and steelhead. This free movement and access to habitat can improve genetic diversity of the fish. Midas Gold will also properly reprocess and safely store old tailings, which, as outlined in Chapter 4 section 4.9 of the DEIS, will lead to a long-term reduction in metal loading in ground and surface water. The company will also solve sedimentation issues by repairing Blowout Creek.

Thank you for reviewing my comments. Again, I urge you to permit Midas Gold's carefully thought out plan as outlined under alternative 2.

Thank You,

Name: matthew pellegrom
