

Dear Payette National Forest Supervisor,

I have reviewed the Plan of Restoration and Operations and met with members of Midas Gold Idaho to better understand the company's plans for the Stibnite Gold Project. Below are my comments on the plan to be included in the comment period.

One of the biggest challenges facing Idaho is having a trained workforce. Midas Gold not only plans to hire hundreds of Idahoans but the company will provide employees with training to build a more skilled workforce in Idaho. We applaud Midas Gold's commitment to helping Idahoans get valuable training that may not otherwise be available. This commitment by the company will help benefit Idaho families and allow Idaho to attract new businesses in the future. To date, Midas Gold has spent over \$89 million in Idaho by prioritizing local vendors and contractors. If the project moves forward, the company will also invest heavily in environmental restoration, especially under alternative 2. During operations, Midas Gold will treat water to lower levels of arsenic, antimony and mercury in the river. This investment will cause concentrations to be below the current baseline conditions (DEIS 4.9-70). The company will also be able to increase productivity and genetic diversity of isolated populations of chinook, bull trout and steelhead by opening up long-term access to blocked habitat (DEIS 4.12-39).

I appreciate your time and thoughtfulness. For the reasons I stated in my letter above, please permit the Stibnite Gold Project using alternative 2 and let Idahoans see the benefits of this important project.

Respectfully,

Name: Frank Kennedy
