

To Concerned Payette National Forest Staff,

If Midas Gold Idaho is allowed to move forward with the Stibnite Gold Project, they will reclaim an area impacted by historical mining, create hundreds of well-paying jobs and provide a huge boost to our economy in the process. It is a win-win for Valley County. We need to permit the project.

Alternative 2 of the Stibnite Gold Project presents a plan to repair the environment and boost Idaho's economy. Historic mining operations, development of former town site and natural processes have resulted in significant degradation of many elements of the environment. Loss of fish passage, potential water degradation from previous mining activity and excessive erosion are all of great concern to Idahoans. Right now, fish haven't swam past an abandoned mine pit for more than 80 years. Midas Gold will reconnect fish passage before mining ever begins. According to 4.12 of the draft environmental impact statement, providing access to these historically blocked areas can improve the genetic diversity of these isolated fish populations. The Stibnite Gold Project would finance reclamation efforts to address these problems and in turn boost Idaho's economy. It is a win-win for everyone.

While the economic benefits of this project cannot be ignored, it also will transform an area in need for environmental repair. It is for all of these reasons that I encourage you to move the Stibnite Gold Project forward as outlined in alternative 2 within this 60-day comment period. .

Most Respectfully,

Name: Scott hollister
