

Dear Payette National Forest Service Staff,

I am writing to **share my support of the Stibnite Gold Project** as outlined in Alternative 2 of the Draft Environmental Impact Statement.

Here is a little more about me, and why I believe this is the right project for Idaho and our country.

I'm an engineer and love spending time in the <sup>Natural</sup> beauty of Idaho. I understand that modern mining is an industrial process, but it can be managed. The towns in Idaho that I've come to love, and the people in them, would greatly benefit from the economic impact of a project like this.

It's an industrial process, but the industry has shown that modern practices and technology can minimize the impact on the environment.

Sincerely,

William
