

Greetings Ms. Jackson and Staff,

Midas Gold Idaho has been a member of our community for the past decade. During this time, the company and its employees have become wonderful champions and supporters of our community. They've volunteered their time in our schools and given generously to community causes. The company's track record of following through on its promises and doing the right thing gives us the confidence to write in support of permitting the Stibnite Gold Project.

The old Stibnite mine site will likely never be cleaned up unless industry takes responsibility for those who came before them. Midas Gold plans to do just that. By mining the site, Midas Gold plans to restore the natural flow and gradient of the East Fork of the South Fork to reconnect historical spawning grounds. The DEIS analysis showed removing existing barriers to fish migration will help Chinook salmon, bull trout and steelhead. In fact, DEIS 4.12-39 says long-term access to blocked habitat would result in increased productivity and genetic diversity of isolated populations. The company will repair blowout creek, permanently solving a source of massive sedimentation and habitat degradation. Plus, in reprocessing and repurposing millions of tons of spent ore and unconstrained tailings, Midas will safeguard water quality indefinitely. To protect the environment, the Forest Service is requiring Midas Gold to implement 156 mitigation measures (appendix D of the DEIS). Part of these measures include a one to one replacement of wetland areas (DEIS 4.11-26), which would lead to a net gain of 346.5 wetland functional units – a 40% increase (DEIS appendix D, table 8-2).

Midas Gold Idaho wants to invest \$1 billion in our state, bring more than 1,000 jobs to rural Idaho and still provide access to Idaho's public lands. This is the type of project our state needs. I highly encourage the U.S. Forest Service to pick alternative 2 as the preferred alternative moving forward.

Respectfully,

Name: Scott Weber
