

Dear Ms. Jackson,

As a business owner in Cascade we are aware of the need to continually grow as a community and town. We have invested much of our assets and time to the Cascade area.

We are thankful for the interest of other companies like Midas Gold Idaho into Cascade and the surrounding area. There will be adjustments and changes in Cascade because of the Stibnite Gold Project, some wonderful and some challenging, but we are in support of what they are trying to do.

As Midas Gold Idaho continues to abide by the laws and regulations, we encourage you to permit the proposed activities outlined by them in its Alternative 2.

To see their commitment to our community, to Idaho and to the project has already made an impression.

We have grandchildren in the Cascade School who can be given an unique opportunity for a well paying job in chemistry or engineering in the next decade, coming back to live here.

Sincerely,

Ashley Thompson
