

Dear Ms. Linda Jackson,

I am writing to express my full support of Midas Gold Idaho and the Stibnite Gold Project. Over the past several years Midas Gold has shown its commitment to Valley County and the state of Idaho and I encourage you to permit the proposed activities outlined by Midas Gold in its Alternative 2.

Restoring the Stibnite Gold Project site will be an incredible investment. Work clearly needs to be done in the area but it should not be funded through taxpayer dollars. Fortunately, Midas Gold Idaho wants to make the investment. The company is proposing a mining project and full-scale restoration project. They have plans to reconnect fish with their natural spawning grounds. According to analysis by the U.S. Forest Service in section 4.2 of the DEIS, establishing long-term access to historically blocked critical habitat would result in increased productivity for Idaho's bull trout, chinook and steelhead. This free movement and access to habitat can improve genetic diversity of the fish. Midas Gold will also properly reprocess and safely store old tailings, which, as outlined in Chapter 4 section 4.9 of the DEIS, will lead to a long-term reduction in metal loading in ground and surface water. The company will also solve sedimentation issues by repairing Blowout Creek.

As the U.S. Forest Service and other state and federal agencies review the proposed plan and determine the course of action, I encourage you to consider and appropriately weigh the positive benefits Midas Gold will have on Idaho. Alternative Two truly is a win-win opportunity for Idahoans and the environment.

Respectfully,

Name: Shane Doyle
