

Dear US National Forest Service Staff,

I am writing to share my thoughts on Midas Gold Idaho's Stibnite Gold project. There are many reasons why I am excited for Midas Gold's project to come to life and I hope through my comments you will understand why.

The Stibnite Gold Project is a huge opportunity for Idaho and our country. While the site is rich in gold deposits it also has deposits of antimony – a mineral designated critical by the U.S. government. In fact, the Stibnite Gold Project is the largest known deposit of antimony in the country. We depend heavily on China for this mineral. Antimony is crucial to the defense and energy industries and is in many items we use on a daily basis, like our cell phones. Permitting the Stibnite Gold Project will allow us to have a domestic resource for this very important mineral.

Midas Gold Idaho wants to invest \$1 billion in our state, bring more than 1,000 jobs to rural Idaho and still provide access to Idaho's public lands. This is the type of project our state needs. I highly encourage the U.S. Forest Service to pick alternative 2 as the preferred alternative moving forward.

Please keep my comments in mind,

Name: Rebekah Gudeman
