

Attention Linda Jackson,

I am writing to express my views on Midas Gold Idaho's Stibnite . I've camped up there many times. It has taken years for nature to heal the destructiveness of the first mine at stibnite. To mine it it again under a false banner of cleaning it up is criminal. I lived in Idaho for years, my Dad was born in Haily. I've seen what destruction these mining operations do. There is never complete safe reclamation. Take a look at millions of dollars spent on cleanup from anaconda copper- and there is still mining going on around the pit. Silver bow fish are contaminated, the creek is contaminated. Please dont let these people go up there and destroy it again

Best Wishes, Sally Rowley Kieffer
