

USFS,

Midas Gold Idaho has been a member of our community for the past decade. During this time, the company and its employees have become wonderful champions and supporters of our community. They've volunteered their time in our schools and given generously to community causes. The company's track record of following through on its promises and doing the right thing gives us the confidence to write in support of permitting the Stibnite Gold Project.

The Stibnite Gold Project will help to restore the environment in our region. Under alternative two, Midas Gold has prioritized restoration work so many of the efforts occur early in the project. The company is also required to set aside all of the funds needed to properly restore the site in a special trust so the land will be restored no matter what happens to the company. Reclamation efforts have already started at the site. Midas Gold has planted thousands of trees and worked to reduce sediment entering waterways near the site. To me, these actions prove the company is truly committed to restoring the site.

I encourage the USFS to move the Stibnite Gold Project forward and permit Midas Gold Idaho's project as outlined in alternative 2 in the DEIS.

Warm regards,

Dr Maurice McDonald
