

Linda Jackson,

Thank you for the opportunity to comment during the Draft EIS period for the Stibnite Gold Project.

Midas Gold has worked hard to prepare a project that shows responsible use of multiple natural resources.

Not only are they planning on cleaning up some past bad practices in the mining industry, they are working hard to restore fish habitat.

All along they have been very transparent with their plans working with multiple government agencies, recreation groups, and other users of our great natural resources.

I've spent my entire career working in the Forest Products business, from Forestry summer camp in McCall to working and playing in Idaho's great forests. It is great to see that Midas Gold is planning on very responsible use of our natural resources.

Midas Gold Idaho is proposing a great project for Idaho's economy, citizens and environment. When the project goes into production, the company plans to invest \$1 billion in Idaho and provide approximately 1,000 jobs over the course of the mine's life. Midas Gold has made a commitment to look to Idaho first for talent and supplies which will have a major trickledown effect and positively impact many facets of the state's economy.

Thank you for the thorough review of the Stibnite Gold Project. I urge you to now move forward and permit the mine using alternative 2 so Midas Gold can put Americans back to work.

Thank You,

Bryce Coulter
