

Attention Ms. Jackson,

I am proud to welcome Midas Gold Idaho into our state and proud to support the Stibnite Gold Project. I hope you will take the time to consider my comments on why you should move to permit the project.

If the Stibnite Gold Project moves forward, it will be the only antimony mine in the America. This important mineral is used as a metal strengthener and fire retardant. It is used in everything from batteries, textiles, cell phones, plastics and cable sheathing. Right now, we important all of our antimony. With all that is currently going on in the world, it is more important than ever that we not rely solely on foreign countries for minerals of such great importance. It is estimated that the Stibnite Gold Project could provide approximately one-quarter of American demand for antimony.

I also know the area well, having flown the mail route and shuttling hunters into the area. I have landed at Johnson Creek, Del David Ranch, Krassel, Big Creek and more.

I encourage the U.S. Forest Service to move the Stibnite Gold Project forward and adopt Alternative two as the preferred alternative.

Have a good day,

Name: Beau Parent
