

DEAR MS JACKSON,

I have been closely following Midas Gold Idaho's plans for several years. I am excited to finally have the opportunity to comment on their Draft EIS. Midas Gold Idaho presents a huge opportunity for the Gem State.

If the Stibnite Gold Project moves forward, it will be the only antimony mine in the America. This important mineral is used as a metal strengthener and fire retardant. It is used in everything from batteries, textiles, cell phones, plastics and cable sheathing. Right now, we important all of our antimony. With all that is currently going on in the world, it is more important than ever that we not rely solely on foreign countries for minerals of such great importance. It is estimated that the Stibnite Gold Project could provide approximately one-quarter of American demand for antimony.

I urge you to accept Midas Gold's plan as outlined under alternative two. The U.S. Forest Service has provided the public with helpful virtual tools and materials to submit meaningful comments on the project within the allotted timeframe. It is time to move this project forward.

Thanks for your Consideration,

Name: Garrett V Randel
