

USFS,

Thank you for the opportunity to comment on the Stibnite Gold Project as part of the U.S. Forest Service's permitting process. I believe this project will greatly benefit the valley county and positively impact the community. It is because this project has a net benefit goal. For example, they will work not only to remove and reprocess the unconstrained legacy tailings but also reforest the project area. These are just two examples out of the various measures taken towards environmental protection in this project.

Thanks Again,

Name: Rushikesh Battulwar
