

Linda Jackson,

Midas Gold Idaho has been a member of our community for the past decade. During this time, the company and its employees have become wonderful champions and supporters of our community. They've volunteered their time in our schools and given generously to community causes. The company's track record of following through on its promises and doing the right thing gives us the confidence to write in support of permitting the Stibnite Gold Project.

I am grateful for the tools the USFS has provided to review the document. One area I was particularly interested in taking a closer look at was the tailings storage facility. I was happy to see in chapter 4 of the DEIS it says, "Based on the slope stability analysis of the proposed design of the TSF dam, failure of the TSF dam from a seismic event is considered to have extremely low probability." This is good news considering the recent earthquakes Idaho has seen. Additionally, I am impressed with the location of the TSF under Alternative 2. This alternative uses the mountains to help secure the facility and would mean the dam would only cover 10% of the entire perimeter. Whereas Alternative 3 would move the TSF to a pristine area "a subpar option.

Midas Gold Idaho wants to invest \$1 billion in our state, bring more than hundreds of jobs to rural Idaho and still provide access to Idaho's public lands. This is the type of project our state needs. The U.S. Forest Service has provided Idahoans with meaningful tools to easily review the document and ample time to comment. I highly encourage the U.S. Forest Service to permit this project following alternative two.

My best,

Name: John Eaton
