

Dear US National Forest Service Staff,

I am excited for the potential of this project, it will have a positive impact on the community in many ways; economy, environment and recreation will all benefit. I am part of a company that has worked in the mining industry for many years - specifically as part of the containment as well as remediation portions of projects like this and from my experience these projects have been successful at delivering the things that Midas Gold is discussing on this project.

Best Regards,

Kirk Lilleskare
