

U.S.F.S.,

Thank you for the opportunity to provide feedback on the Stibnite Gold Project as part of the public permitting process. I know this project will have a positive impact on the environment, communities surrounding the site and Idahoans.

The Stibnite Gold Project is a huge opportunity for Idaho and our country. While the site is rich in gold deposits it also has deposits of antimony – a mineral designated critical by the U.S. government. In fact, the Stibnite Gold Project is the largest known deposit of antimony in the country. We depend heavily on China for this mineral. Antimony is crucial to the defense and energy industries and is in many items we use on a daily basis, like our cell phones. Permitting the Stibnite Gold Project will allow us to have a domestic resource for this very important mineral.

While the economic benefits of this project cannot be ignored, it also will transform an area in need for environmental repair. It is for all of these reasons that I encourage you to move the Stibnite Gold Project forward as outlined in alternative 2 within this 60-day comment period.

Respectfully,

Name: Patricia Phelps
