

U.S.F.S. Officials,

Midas Gold Idaho has been a member of our community for the past decade. During this time, the company and its employees have become wonderful champions and supporters of our community. They've volunteered their time in our schools and given generously to community causes. The company's track record of following through on its promises and doing the right thing gives us the confidence to write in support of permitting the Stibnite Gold Project.

By law Midas Gold Idaho is required to set aside all of the money needed for restoration prior to any mining activity. This gives me, and Idahoans, peace of mind that the restoration work the company has discussed will come to fruition no matter what happens. If Midas Gold Idaho is allowed to move forward with its work, salmon will be reconnected to their native spawning grounds. This hasn't happened in 80 years! Mining has devastated this area. Midas Gold Idaho wants to fix it and I hope you will clear the path to allow their restoration work to move forward.

I would like to thank the U.S. Forest Service for providing the opportunity, and sufficient time, to comment on this important project's permitting process. I hope the U.S. Forest Service will realize the benefits this project and permit the Stibnite Gold Project using alternative 2.

My best,

Name: Paul Wessler
