

Ms. Jackson,

I am proud to submit my comments in support of Midas Gold Idaho's Stibnite Gold Project. This project presents our state with an incredible opportunity to bring well-paying jobs to rural Idaho, boost our state's economy and use private investment to clean up a brownfield site.

If the Stibnite Gold Project moves forward, it will be the only antimony mine in the America. This important mineral is used as a metal strengthener and fire retardant. It is used in everything from batteries, textiles, cell phones, plastics and cable sheathing. Right now, we important all of our antimony. With all that is currently going on in the world, it is more important than ever that we not rely solely on foreign countries for minerals of such great importance. It is estimated that the Stibnite Gold Project could provide approximately one-quarter of American demand for antimony.

Midas Gold Idaho wants to invest \$1 billion in our state, bring more than 1,000 jobs to rural Idaho and still provide access to Idaho's public lands. This is the type of project our state needs. And with the coronavirus, we need it now more than ever. The USFS has provided sufficient time to review the document and provide comments. It is time to move forward. I highly encourage the U.S. Forest Service to pick alternative 2 as the preferred alternative for the Stibnite Gold Project.

Best Wishes,

Name: Carlton Hughes
