

USFS,

I am writing to express my full support of Midas Gold Idaho and the Stibnite Gold Project. As a born and raised Idahoan who has spent a lot of time hiking, riding and hunting in the Yellow Pine, Stibnite area. I have seen nothing but improvement since Midas started the project. The site was suffering from massive erosion, tons of litter and illegal off-roading caused damage.

Midas has mitigated the unchecked erosion, picked up the trash and repaired much of the damage to the environment caused by the bad actors of the past. They are also providing much needed jobs and tax revenue for Idahoans.

Midas Gold Idaho wants to invest \$1 billion in our state, bring hundreds of jobs to rural Idaho. I have worked on the meadow creek project several times in the past for subcontractors myself. I was on the crew that surveyed and staked the claims, then came back years later and did a geopolitical survey. The improvements Midas had made in that amount of time were impressive to say the least.

This project is a great opportunity for Idaho, Idahoans and the USFS to clean up past damage done to the area all while creating jobs and generating revenue. I highly encourage the U.S. Forest Service to permit this project following alternative two.

Sincerely, Carson A Eleazer
