500 North Mission Street
McCall, ID 83638

Greetings,

I am writing to express my views on Midas Gold Idaho's Stibnite Gold Project. The opportunity presented by the Stibnite Gold Project is compelling for many reasons.

Midas Gold has carefully researched the Stibnite Gold Project since 2009. Throughout this time, the company has proactively engaged members of our community and consistently sought our feedback. Some of our suggestions are reflected in alternative two – including the proposed road to site to keep traffic and potential pollutants away from our waterways. The company selected using Burntlog Road after many discussions with residents. In my mind, actions speak louder than words and Midas Gold has proven they will be a good partner moving forward.

The comment period for the project was already extended once. The U.S. Forest Service has given the public more than adequate time to comment, plus tools that make reviewing the document easy and a virtual meeting room to make information more digestible. I encourage the U.S. Forest Service to continue to move the project forward and permit the site using alternative 2 as the guide.

Thank You,

MICK WILSON
