

My name is Cale Culton and I live in Donnelly Idaho.

I am hoping to get a decent job when I graduate from school, and knowing that something might open at Midas gets me hopeful. There is not much here.

On this site from Midas, I did see that they will be offering chances for training.

I know this will be good for us in Idaho, as so many of us, especially around here have to do construction or work at restaurants and maybe even as a wildland firefighter.

I also really like they will make a road away from the river to drive material and will work on the contaminated site so the salmon can have a pathway again.

If you approve the draft please be sure to pick the option 2 where they clean the contaminated area up.

Thanks for listening, I really want Midas to happen.

Sincerely,

Cale Culton
