

Dear Ms. Jackson,

I am proud to welcome Midas Gold Idaho into our state and proud to support the Stibnite Gold Project. I hope you will take the time to consider my comments on why you should move to permit the project.

Midas Gold is very aware of the water quality concerns at site and has been sampling it for years. They've found very high arsenic and antimony levels in certain areas, in some cases 700 times worse than what is considered safe. To address these issues, the company will remove legacy tailings and other waste that cause this issue. Overall, Alternative 2 seems to cover every risk factor possible; it improves upon the company's original 2016 plan, which they adjusted following feedback, and it is superior to Alternatives 3 and 4, which have more safety concerns and could cause delays. And of course, it is better than Alternative 5, which is to do nothing; we cannot afford that approach after all these years.

For the above reasons and many more, please move forward with alternative 2 of the Stibnite Gold Project as it is important to all Idahoans. The comment period provides plenty of time to read the DEIS and submit comments. Further extensions of the comment period are unnecessary and will needlessly delay the project.

Thanks Again,

Name: Tim Kelly
