

Linda Jackson,

I am writing to express my full support of Midas Gold Idaho and the Stibnite Gold Project. Over the past several years Midas Gold has shown its commitment to Valley County and the state of Idaho and I encourage you to permit the proposed activities outlined by Midas Gold in its Alternative 2.

The team at Midas has spent countless hours researching and designing the best possible solution for water quality conditions at the site. By cleaning up the legacy tailings that are currently sitting unlined in the valley floor, Midas will improve the water quality for fish, wildlife and nearby residents. Alternative 2 includes a plan to neutralize the metals in the tailings before they are stored in the fully lined facility. This will greatly improve ground and surface water conditions at the site and be a big step forward to improving the environmental conditions at the site. I prefer Alternative 2 because it will allow bring solutions to the site in the most timely manner. Alternative 3 and 4 would delay these benefits by two years and, sadly, Alternative 5 would leave the site as it is today and conditions would likely only get worse.

The Stibnite Gold Project is the type of project our state needs. I highly encourage the U.S. Forest Service to permit this project, using alternative two presented by Midas Gold, as expeditiously as possible. There is no need to extend the comment period. Sixty days is plenty of time to comment and we need the benefits of this project now.

Thanks for your Consideration,

Name: Raj kumar
