

TO WHOM IT MAY CONCERN,

Thank you for allowing me an opportunity to provide some feedback concerning Midas Gold's Stibnite Gold Project and the public permitting process. Thank you for taking the time to consider my comments and for giving those of us in Idaho who will be most impacted by this project an opportunity to participate in this excessive permitting process.

After going through the complex and exhaustive DEIS documents, from a mining engineer who is not connected to the company or the project, Alternative two looks by far to be the best option for environment, the state, the federal government, 1.

This Stibnite Gold Project is a huge opportunity for Idaho. I am grateful for the tools the Forest Service has provided to review the DEIS and learn more about the project. These tools have given Idahoans sufficient time to comment. Please accept alternative 2 as it looks like it in the best interest of all parties affected and please continue to move this project responsibly forward so we can realize the positive impacts from the jobs offered as well as expedite reclamation efforts on this site sooner than later - for the benefit of us taxpayers.

Best Wishes,

Alan Gilda

Mullan, Idaho
