

Dear Ms. Jackson,

Thank you for the opportunity to comment on Midas Gold Idaho's Alternative 2. Over the last several years, I've had the opportunity to hear a handful of presentations on the Stibnite Gold Project, sit down with project staff and observe how the company has lived out its mission as it has grown. It is with this knowledge that I encourage you to permit the Stibnite Gold Project.

I am impressed by Midas Gold's plans to clean up water quality conditions at the site by removing sediment and old materials blocking the East Fork of the South Fork of the Salmon River. Today, steelhead and Chinook salmon cannot access spawning grounds because they are blocked by an abandoned mining pit. Midas will address this issue before mining even begins – reconnecting fish for the first time in more than 80 years. The company will build a fish passageway in the short term and eventually restore full access to 25 miles of perennial stream and 6 miles of fish spawning habitat above the Yellow Pine pit. If we do not allow Midas Gold to move forward with their plans, it is highly unlikely anyone else will provide the funds needed to reconnect fish to this currently lost habitat.

Thank you for the thorough review of the Stibnite Gold Project. I urge you to now move forward and permit the mine using alternative 2, so Midas Gold can put Americans back to work.

Best Wishes,

Name: Patricia Phelps
