

To Concerned Payette National Forest Staff,

I am writing to express my full support of Midas Gold Idaho and the Stibnite Gold Project. Over the past several years Midas Gold has shown its commitment to Valley County and the state of Idaho and I encourage you to permit the proposed activities outlined by Midas Gold in its Alternative 2. This project helps so much from the community here in Valley County. As they bring workers here it helps provide profits for our local business. From their employees staying at our hotel and eating at our restaurants, it helps bring revenue into our community during our slower times.

Alternative 2 provides a higher degree of safety for both the location of a new tailings storage facility as well the road options for accessing the site. Under this alternative, Midas Gold will locate its tailings storage facility in an area that is already impacted by past mining activity, whereas Alternative 3 would place it in an untouched area of the site. This unnecessarily exposes more of the surrounding environment to mining operations. For road safety, Alternative 2 reduces the risk of potential spills, minimizes sediment runoff to waterways, and avoids winter avalanche site whereas Alternative 4 would keep the access road where it is, adjacent to the river.

Midas Gold is improving our lands and making it better then they found it!

Idahoans need to see the benefits of the Stibnite Gold Project come to life. The comment period should be kept to 60 days, so the process can continue to move forward. It is with this knowledge that I encourage the U.S. Forest Service to select the modified plan of restoration and operations Midas Gold Idaho presented, known as Alternative 2 in the draft Environmental Impact Statement, and permit the project.

Warm regards,

Name: Jessica Points
