

Dear Ms. Linda Jackson,

It is with great pleasure that I write to the U.S. Forest Service to encourage you to permit the proposed activities outlined by Midas Gold in Alternative 2 during this public input process.

I am pleased to see Midas Gold wants to take responsibility and clean up the damage left behind by mining operations in the early 20th Century “ even though the company was not involved in any of the previous activity at the site. Midas Gold has a plan to reunite salmon and trout with their spawning grounds for the first time in 80 years. Their plan for the East Fork of the South Fork of the Salmon River over the backfilled Yellow Pine pit will recreate natural conditions as close as possible. They plan to provide permanent access to approximately 25 miles of perennial stream and 6 miles of anadromous fish spawning habitat, and the company has agreed to install a temporary artificial fish passageway that will allow fish to swim past the old mining pit before mining even begins.

Thank you for the thorough review of the Stibnite Gold Project. I urge you to now move forward and permit the mine using alternative 2, so Midas Gold can put Americans back to work.

Best Wishes,

Name: Levi Billman
