Dear Permitting Officials,

I am an Idahoan, recreationalist and passionate about what happens to our backcountry. With all of these roles, I am proud to welcome Midas Gold Idaho into our state and proud to support the Stibnite Gold Project. I hope you will take the time to consider my comments on why you should move to permit the project.

After reading through the alternatives proposed by the USFS, Alt 5 seems unacceptable. If private industry is willing to take on past legacies, what will happen to the environmental legacies at Stibnite if there is no action? What resources will the U.S. Government dedicate to solving the water quality and fish passage problems if Alt 5 is selected? I worry no resources will be directed to the site and arsenic and antimony will continue leaching into the groundwater and salmon will continue to be blocked from their native spawning grounds. However, if the USFS selects Alternative 2 the site would get the environmental attention that it needs. Under Alternative 2, Midas Gold will pick up and reprocess these legacy tailings, which will reduce long-term metal loading in the ground and surface water (DEIS 4.9).

After reading my letter, I hope you can see why you should permit the Stibnite Gold Project as outlined in Alternative 2. I also hope the letter is proof that 60 days is enough time to participate and the comment period does not need to be extended yet again. This project is a good thing for Idaho, helps decrease America's dependence on foreign countries for critical minerals and cleans up the environment.

Thanks for your time,

Destiny
