

Attention payette national forest supervisor,

Thank you for the opportunity to provide my feedback as part of Midas Gold Idaho's public permitting process.

Alternative 2 is the best proposal for Idaho communities. This alternative promises to create hundreds of local jobs. Midas Gold has committed to purchasing supplies locally as much as possible and have already spent millions in Idaho to date. The company predicts it will directly employ somewhere around 500 people during construction and operations of the mine. Independent studies also show hundreds of indirect jobs will be created as a result of the Stibnite Gold Project during both phases of the project. I am excited about the opportunities this could bring for Idaho families “ especially as our nation attempts to recover from the ongoing pandemic. But besides the economic benefits, the project will help our environment. Right now, the area of the proposed mine is a brownfields site. Cleaning it up will be expensive. And no one else is proposing to do the work besides Midas Gold. If the Stibnite Gold Project doesn't move forward, this burden will fall to us as taxpayers or more likely, the site may never get cleaned up at all.

I urge you to accept Midas Gold's plan as outlined under alternative two. The U.S. Forest Service has provided the public with helpful virtual tools and materials to submit meaningful comments on the project within the allotted timeframe. It is time to move this project forward.

I work heavy civil construction. So I know the standards we are held to these days. I know Midas Gold will adhere to these standards. I believe we will end up with a properly rehabbed and rehabilitated river and mountain valley.

Thank You,

Name: Corey Price
